

SmRF — Smart Radon Fan*

Let SmRF protect your home

* Patent Pending. USPTO 19/426,089

“Where’s the on/off switch?”

- Homeowners don’t understand their radon mitigation system.

“It’s too noisy.”

- “I can’t comfortably use that side of the garden any longer.”
- Radon fans run 24/7 — whether needed or not.

“Is it even working?”

- No real-time feedback. No integrated monitoring.
- How often should I test?
- How many times do I need to check the Airthings app?

“Is it really necessary?”

- AC noise makes sense. Radon fan noise doesn't (because AC noticeably cools the home, its noise is tolerated).
- A radon fan, without feedback, is viewed as an annoyance.

The Industry Gap

- Always ON
- No feedback
- No automation

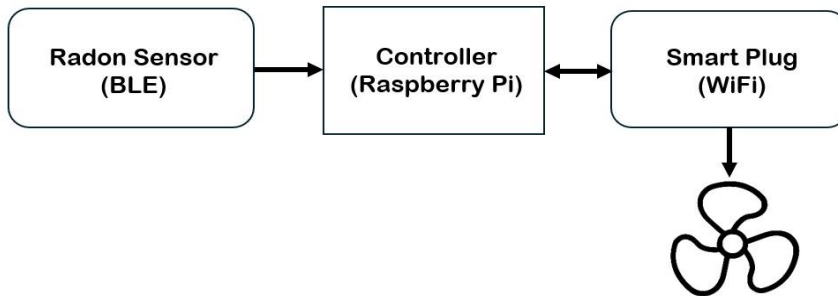

Let's bring radon mitigation into the
21st century.

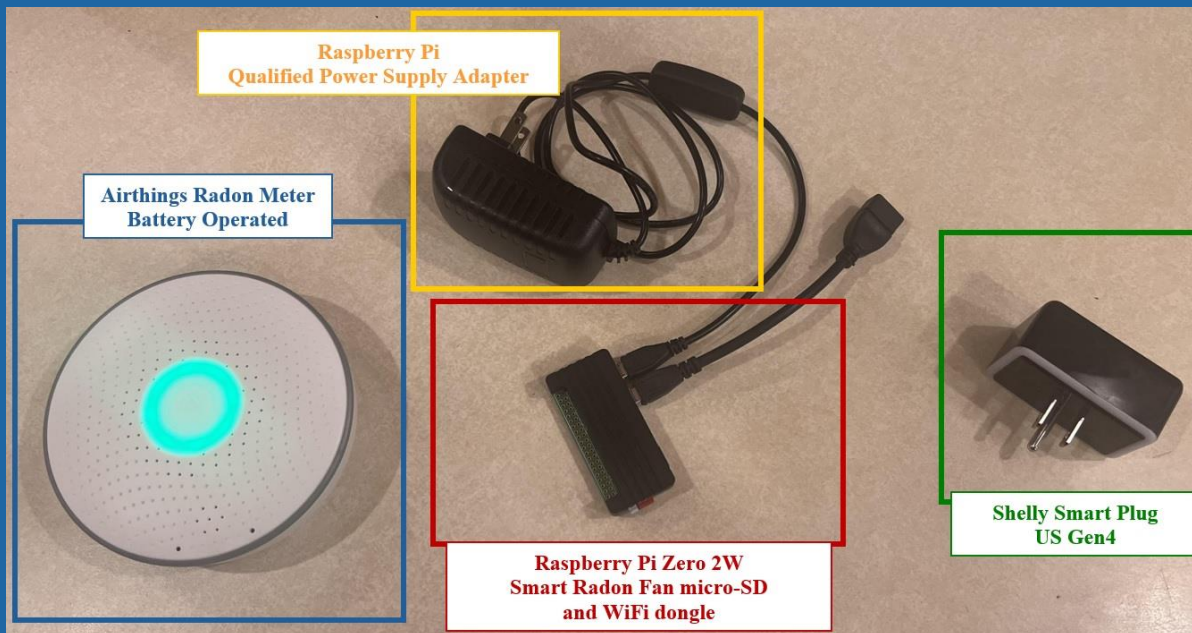

SmRF — Smart Radon Fan

- Intelligent
- Automated
- Verified

SmRF Design

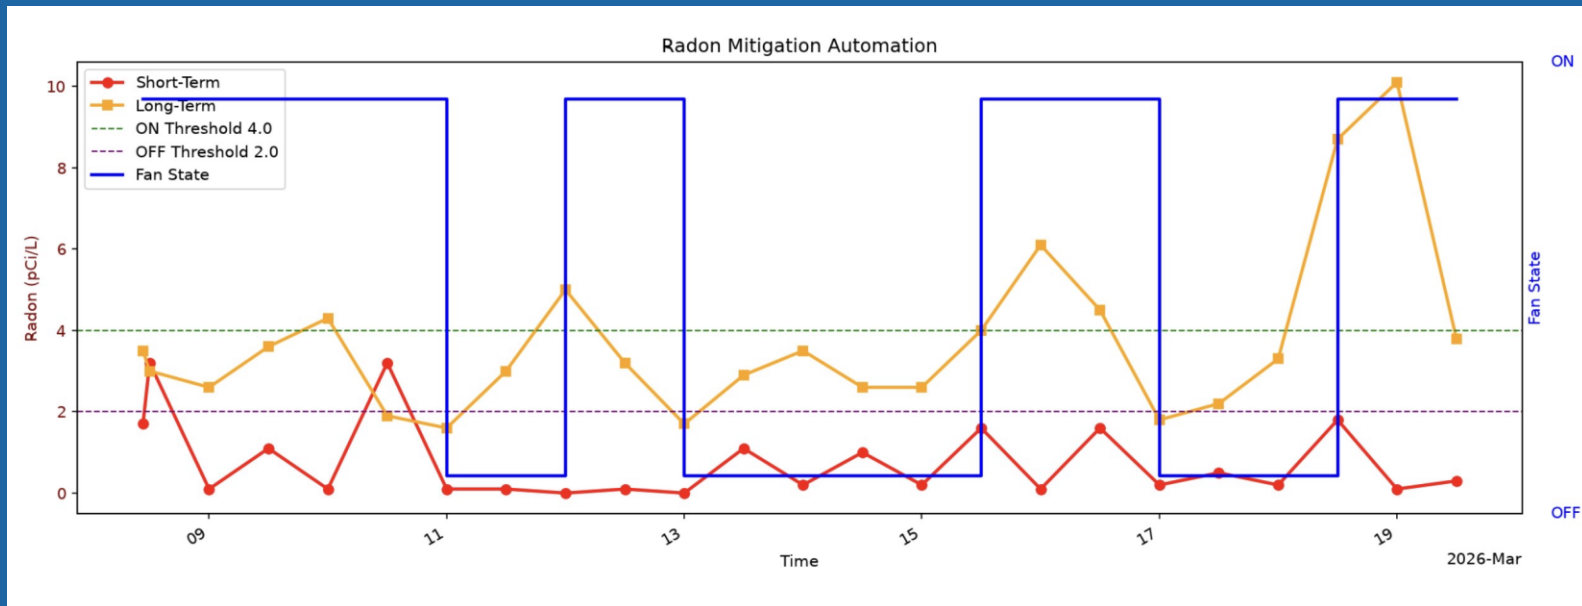

Current Embodiment

< \$200 retail

SmRF in Action

- Radon fluctuates
- Fan ON/OFF thresholds
- Parameterized hysteresis

Installer Opportunity

- Installation revenue + recurring share

Vision

- Smart, trusted, verified radon mitigation

SmRF makes radon mitigation visible—

- It shows the system responding to changing radon levels, keeping them under control;
- It gives both installer and homeowner confidence that mitigation is working and efficient.

“Now I know it’s working.”

- It runs when needed
- Verified
- Optimized
