

SmRF — Smart Radon Fan^(*)

Let SmRF protect your home

* Patent Pending. USPTO 19/426,089.

“Where’s the on/off switch?”

- Homeowners don’t understand their radon mitigation system.

“It’s too noisy.”

- “I can’t comfortably use that side of the garden any longer.”
- Radon fans run 24/7 — whether needed or not.

“Is it even working?”

- No real-time feedback. No visible monitoring.

“How often should I test?”

- Uncertainty creates doubt.

AC noise makes sense. Radon fan noise doesn't.

- An AC noticeably cools the home. So its noise is tolerated.
- A radon fan, without feedback, is viewed as an annoyance.
- “Is it really necessary?”

The Industry Gap

- Always ON
- No feedback
- No automation

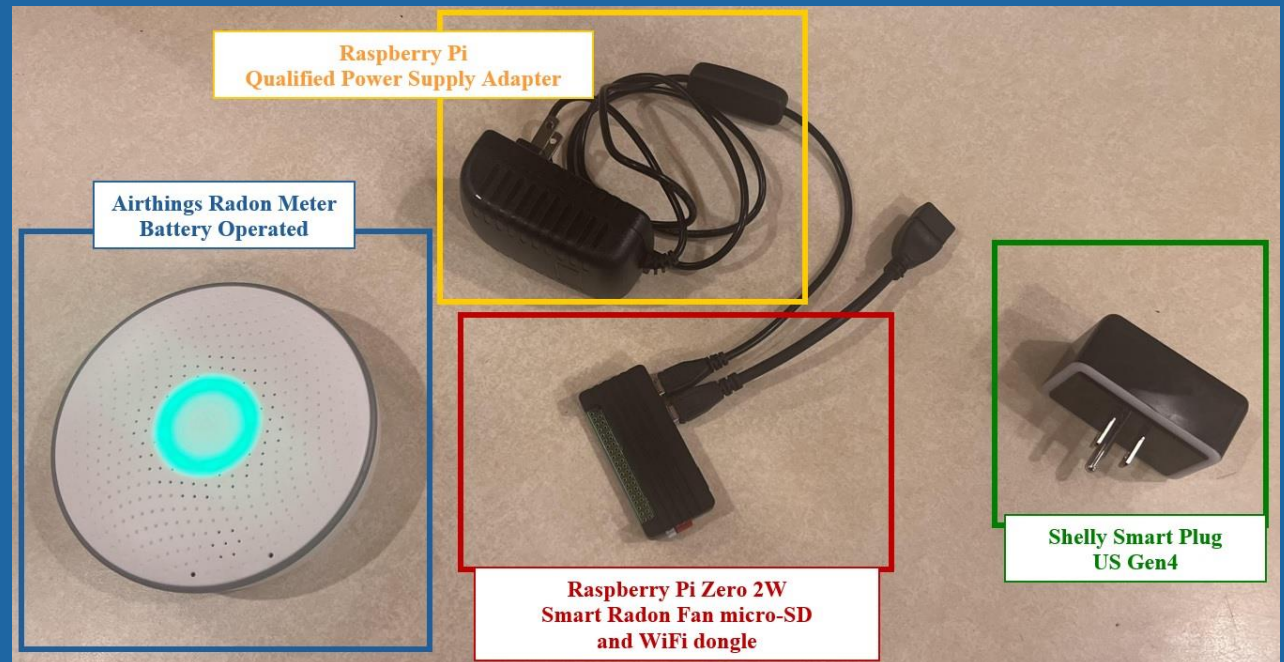

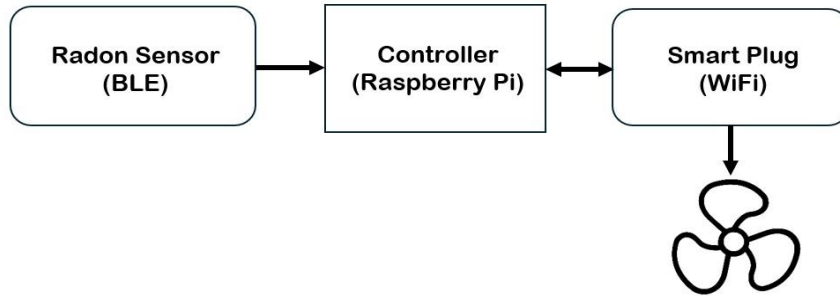

Let's bring radon mitigation into the
21st century.

SmRF — Smart Radon Fan

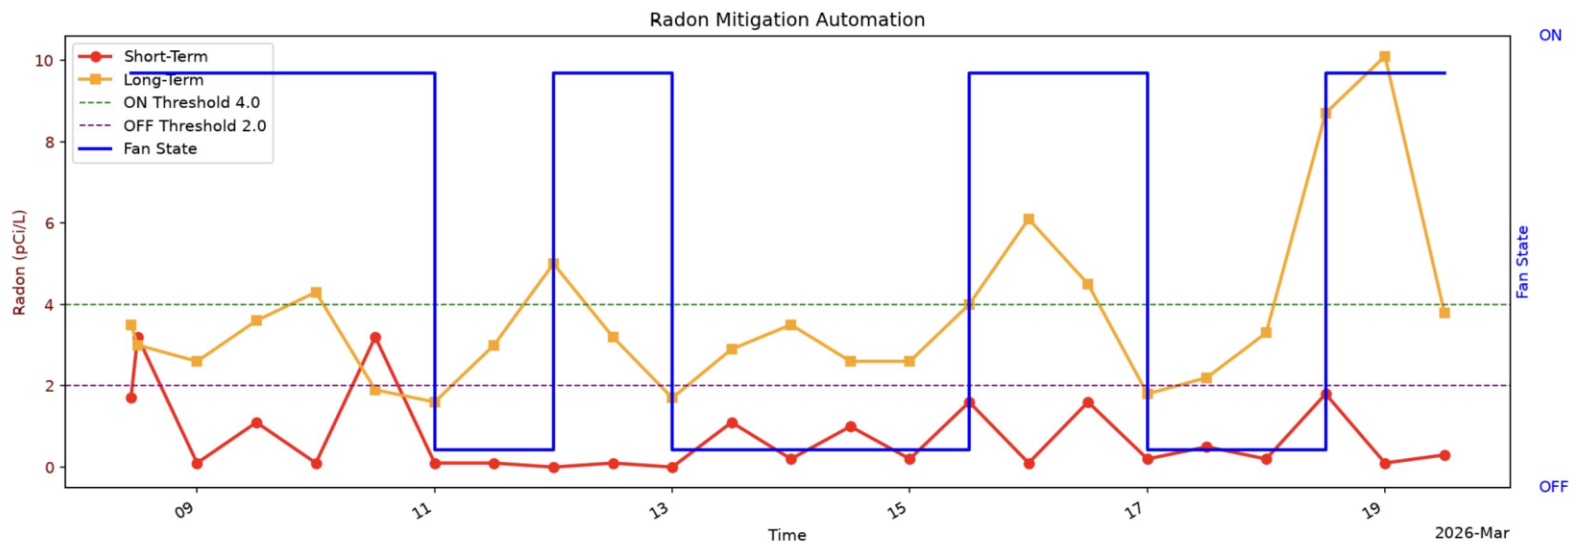

- Intelligent
- Automated
- Verified

SmRF Design

SmRF in Action

- Radon fluctuates
- Fan ON/OFF thresholds
- Parameterized hysteresis

Business Model

- Hardware + Subscription

Installer Opportunity

- Installation revenue + recurring share

Vision

- Smart, trusted, verified radon mitigation

“Now I know it’s working.”

- It runs when needed.
- Verified. Optimized.
